

Here we
GOAT
AGAIN!

Creating a fire adapted community takes commitment, planning, funding and GOATS!

Our 2016 Goat Grazing Project has expanded with grants & donations allowing more work days for the goats. A major component of grant awards is educational community involvement.

PR will host a city and community wide
Wildfire Preparedness Open House
Saturday, June 25th, from 9-1:00

While the goats are working hard, representatives from South Metro Fire Rescue, CO State Forest Service, Douglas County and Goat Green will answer questions and promote preparedness safety.

We are expecting a busy morning with many people coming to learn about the goats, fire mitigation and our beautiful and proactive PR community. We ask for your cooperation and patience during these few hours and please plan your day accordingly.

PineRidge Open Space Goals

- Protect our homes from the threat of wildfire.
- Act responsibly and manage our open space through long term solutions.
- Create an aesthetically pleasing and natural environment.
- Encourage and live well with wildlife.

2016 FUNDING & RESEARCH

PR is under consideration for a research study by Colorado Forest Restoration Institute (an arm of CSU) to study the effects of goats and gambel oak as they relate to fire mitigation.
